SUMMARY

Enthusiastic second-year undergraduate specializing in Artificial Intelligence at SLIIT, with hands-on experience in full-stack web and mobile application development, machine learning, and AI-driven solutions. Skilled in Java, Python, JavaScript, React, React Native, Spring Boot, Node.js, MongoDB, and TensorFlow. Experienced in developing real-world projects including learning management systems, healthcare management systems, AI chatbots, crop disease detection systems, and predictive analytics applications. Passionate about learning emerging technologies, solving complex problems, and contributing to innovative software and AI projects while continuously developing technical and professional skills.

PROJECTS

FEB 2026 – APR 2026

EduHub Student-Tutor LMS Mobile Application

- Developed a full-stack LMS mobile application using React Native, Node.js, Express.js, and MongoDB.
- Implemented secure user authentication, course management, learning material sharing, and responsive mobile interfaces.
- Applied RESTful API integration to enable seamless communication between frontend and backend services.

FEB 2026 – APR 2026

Web-Based Agriculture Community & Management System

- Developed a web-based agriculture platform featuring community management, farmer interaction, and AI-powered support services.
- Built an AI chatbot to provide real-time assistance and agricultural guidance.
- Developed a crop disease detection model using image classification techniques with TensorFlow and Python.

JUL 2025 – SEP 2025

Web-Based Dental Management System

- Developed a web-based clinic management system using Spring Boot and SQL Server.
- Implemented patient record management, appointment scheduling, and clinic workflow automation features.
- Enhanced operational efficiency through organized data management and streamlined scheduling processes.

JUL 2025 – SEP 2025

Loan Prediction System

- Developed a machine learning model to predict loan approval outcomes using financial and demographic data.
- Performed data preprocessing, feature engineering, and model evaluation using Python, Pandas, and Scikit-learn.
- Improved prediction accuracy and supported data-driven loan evaluation decisions.

FEB 2025 – APR 2025

Online Bookstore Management System

- Developed a web-based bookstore management system using Java and object-oriented programming principles.
- Implemented CRUD operations, file handling, and custom Linked List data structures for efficient data management.
- Managed book inventory, user records, and transaction processing through an interactive web interface.

EDUCATION

JAN 2019 – JAN 2021

Sri Subhuthi National School | G.C.E O/L

JAN 2021 – JAN 2023

Sri Subhuthi National School | G.C.E A/L

JAN 2024 – JAN 2028

BSC(Hons) in Information Technology, Artificial Intelligence Specializing in Artificial Intelligence

TECHNICAL SKILLS

Programming Languages:

Java | Python | JavaScript | SQL | R

Frontend Technologies:

HTML | CSS | React | React Native

Backend Technologies:

Spring Boot | Node.js | Express.js

Databases:

MongoDB | SQL Server

AI & Machine Learning:

TensorFlow | Pandas | Scikit-learn | Machine Learning | Artificial Intelligence

Tools & Platforms:

Git | GitHub | Postman | VS Code | IntelliJ IDEA | Google Colab

SOFT SKILLS

Problem Solving | Teamwork | Adaptability | Time Management | Communication

CERTIFICATIONS

- **Certificate in AI/ML Engineer SLIIT**
Stage 1 - <https://code.sliit.org/certificates/nddgg8tgttd>
Stage 2 - <https://code.sliit.org/certificates/cbxmlyyplk>
- **Centre for Open & Distance Learning (CODL)**
University of Moratuwa - <https://open.uom.lk/lms/mod/customcert/view.php?id=675&downloadown=1>
